Treatment at the UAB Comprehensive Cancer Center

The UAB Comprehensive Cancer is recognized nationwide as a leader in the fields of prostate cancer treatment and research. Prostate cancer patients at the UAB Comprehensive Cancer Center are seen in the Multidisciplinary Prostate Center, which treats patients through a team of specialists who work together to pool their vast experience and knowledge to provide the best care possible. Because this clinic affords patients the opportunity to see multiple specialists in one day, treatment time – and stress – is dramatically decreased, resulting in a personal care plan that is truly comprehensive.

Prostate Cancer Research at the UAB Comprehensive Cancer Center

The UAB Comprehensive Cancer Center is a nationally recognized leader in the field of prostate cancer research. The center was one of the first institutions in the nation to offer robotic surgery for prostate cancer patients, which utilizes a minimally invasive approach to lessen patient discomfort and shorten recovery time.
